## Customer Problem Statement Template

## Customer Problem Statements

| Problem Statement (PS) | I am (Customer) | I'm trying to | But | Because | Which makes me feel |
|---|---|---|---|---|---|
| PS-1 | An Automotive Strategy Executive | Decide which vehicle segments and battery chemistries to invest in for our next production cycle | I can't easily see the correlation between battery types, range efficiency, and customer satisfaction | Global sales and technical data are scattered across multiple disconnected spreadsheets and regional reports | Uncertain and hesitant about committing massive capital to a new EV platform |
| PS-2 | A Global Supply Chain Manager | Identify production bottlenecks and geographical dependencies for our battery technologies | I lack a consolidated view of where specific OEM competitors are manufacturing their vehicles | The manufacturing footprint and market share data isn't mapped geographically alongside battery adoption rates | Exposed to supply chain risks and unprepared for regional policy or trade changes |
