Ideation Phase: Empathize & Discover

Field	Details
Date	23 October 2026
Team ID	N/A (Individual Project)
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	4 Marks

Empathy Map Canvas

1. WHO are we empathizing with?

- **User:** Automotive Strategy Executive / EV Market Analyst.
- **Situation:** They need to make data-driven decisions regarding EV market investments, segment targeting, and battery chemistry adoption.

2. WHAT do they need to DO?

- Track global EV sales, pricing, and range efficiency.
- Identify production bottlenecks and geographical dependencies.
- Correlate battery types with customer satisfaction.

3. WHAT do they SEE?

- Fragmented, static market reports across disconnected spreadsheets.
- Competitors launching new EV models with advanced battery tech.
- Complex supply chain data that lacks geographical mapping.

4. WHAT do they SAY?

- "We need a clear, interactive view of the global EV market."
- "How does battery chemistry actually impact our customer satisfaction ratings?"
- "I can't make strategic platform decisions on static data."

5. WHAT do they DO?

- Spend hours cross-referencing multiple regional reports.
- Struggle to visualize price-to-range dynamics clearly for stakeholders.
- Seek consolidated dashboards to streamline their workflow.

6. WHAT do they HEAR?

- Stakeholders demanding higher ROI and clear strategic direction.
- Consumers expressing range anxiety and demanding better battery performance.
- Industry news about emerging solid-state and sodium-ion technologies.

7. WHAT do they THINK and FEEL?

- **Pains:** Frustrated by scattered data, fear of investing massive capital into the wrong battery platform, and exposure to supply chain risks due to a lack of geographic visibility.
- **Gains:** Needs a unified, interactive Tableau dashboard for instant insights, wants clear visualization of price vs. range, and hopes to feel confident when presenting strategic recommendations to the board.
