Project Design Phase-II: Data Flow Diagram & User Stories

Field	Details
Date	25 October 2026
Team ID	N/A (Individual Project)
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	4 Marks

Data Flow Diagram Architecture

A Data Flow Diagram (DFD) visually represents how data enters, changes, and leaves the system. For this BI dashboard, the data flows from raw CSV files into an interactive web interface.

- **External Entity (Data Source):** Raw Global EV Market Data (CSV/Excel files) containing sales, battery technology, and pricing.
- **Process 1 (Data Ingestion & Cleaning):** Tableau Data Connections ingest the files; data types, calculated fields, and geographic roles are configured.
- **Data Store:** Tableau Local Extract (.twbx) stores the cleaned and optimized data structure.
- **Process 2 (Data Visualization):** Tableau Desktop maps the relationships and generates the 3x3 dashboard and 6-point Story.
- **Process 3 (Publishing):** The completed workbook is uploaded, rendered, and hosted on Tableau Public servers.
- **External Entity (End User):** Automotive Strategy Executives and Supply Chain Managers interact with the web-based dashboard using filters and parameters.

User Stories

User Type	Epic	Story No.	User Story / Task	Acceptance Criteria	Priority	Release
Strategy Executive	Data Visualization	USN-1	As an Executive, I want to view a top-level KPI scorecard of total sales and average price so I can quickly gauge market scale.	Scorecard correctly aggregates and displays the top-level KPIs.	High	Sprint-1
Supply Chain Manager	Geospatial Analysis	USN-2	As a Supply Chain Manager, I want to see a geographic map of EV manufacturing hubs to identify production bottlenecks.	Interactive map renders production volumes by global region.	High	Sprint-1
Market Analyst	Interactive Filtering	USN-3	As an Analyst, I want to filter the dashboard by battery chemistry (NMC, LFP) to compare performance and pricing.	Filters successfully update all charts across the dashboard in real-time.	High	Sprint-1
Market Analyst	Storytelling	USN-4	As an Analyst, I want to navigate a 6-point Tableau Story so I can present a cohesive narrative to stakeholders.	The 6 story points are logically sequenced and accessible via navigation tabs.	Medium	Sprint-2
Stakeholder	Deployment & Access	USN-5	As a Stakeholder, I want to access the dashboard online via a web link without needing Tableau software installed.	The final dashboard is successfully published and accessible on Tableau Public.	High	Sprint-2
