Project Design Phase-I: Problem - Solution Fit Canvas

Field	Details
Date	25 October 2026
Team ID	N/A (Individual Project)
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	2 Marks

Box	Content
1. Customer Segment(s)	Automotive strategy executives; supply chain managers; EV market analysts seeking data-driven insights.
2. Jobs-to-be-Done / Problems	Track global EV sales; compare battery technologies with customer satisfaction; identify production bottlenecks. Data is fragmented across sources.
3. Triggers	Quarterly strategy board meetings; competitors launching new EV models; sudden supply-chain disruptions.
4. Emotions: Before / After	Before: frustrated, overwhelmed, uncertain about major investments. After: confident, empowered, clear-headed through visual evidence.
5. Available Solutions	Static Excel spreadsheets; disconnected regional PDF reports; complex IT-dependent BI systems.
6. Customer Constraints	Little time to compile data manually; limited coding/database skills; need immediate strategic answers.
7. Behaviour	Spend hours cross-referencing regional reports; struggle to present price-versus-range patterns clearly to non-technical stakeholders.

8. Channels of Behaviour	Online: spreadsheets shared by email, virtual meetings, industry-news searches. Offline: in-person boardroom strategy sessions.
9. Problem Root Cause	EV sales, pricing, and battery data are not centrally mapped geographically or connected in one interactive visual format.
10. Your Solution	Interactive 3x3 Tableau dashboard plus a six-point executive Tableau Story consolidating global EV market data and mapping sales, pricing, and battery chemistries geographically.
