Dashboard Design

Field	Details
Date	26 October 2026
Team ID	N/A (Individual Project)
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	5 Marks

Creating an effective dashboard involves thoughtful design to ensure that the presented information is clear, relevant, and easily understandable for the intended audience. Key principles include:

- Clear and Intuitive Layout
- Use Appropriate Visualizations
- Colour and Theming
- Interactive Filters and Slicers
- Drill-Down Capabilities
- Responsive Design
- Custom Visuals and Icons
- Use of Infographics

Major Outcomes

Here are five major outcomes derived from the Electric Vehicle Market Performance & Insights dashboard:

- **Global Market Overview:** The dashboard tracks a large global EV market with total cumulative sales of 1,550.7M units, an average vehicle price of $65K, an average range of 325km, and a customer rating of 4.09.
- **Top Selling Segments:** Two-Wheeler Scooters lead the market in total volume (174.6M units), followed by Hatchbacks (154.9M), Compact SUVs (153.4M), and Sedans (153.4M).
- **Battery Chemistry Adoption & Efficiency:** NMC and LFP are the largest battery chemistries by volume, at 33.80% and 31.99% of the market. Sodium-Ion shows a marginally higher median range (341km) than the other chemistries (337–338km).
- **Price vs. Range Dynamics:** The scatter plot shows larger vehicles such as Luxury SUVs and Luxury Sedans offering higher range at premium price points, while Micro City Cars are the most affordable but have the shortest range.
- **Global Production Footprint:** Manufacturing volume is spread across ten countries, with India, China, and the USA showing the largest totals in the manufacturing country view.

Activity 2: Publish Dashboard on Tableau Public

Publish Dashboard on Tableau Public and paste the dashboard public link below:
